CODE, LAW AND CAPITAL / FRONT MATTER

Detailed Contents

Paragraph-level navigation across the complete Treatise

PART I	FOUNDATIONS AND THE GOVERNING TRIAD	CHAPTERS 1-6
PART II	PAKISTAN'S DIGITAL AND VIRTUAL-ASSET LEGAL ORDER	CHAPTERS 7-9
PART III	FINANCIAL, PROPERTY, INTEGRITY AND FISCAL ORDER	CHAPTERS 10-13
PART IV	DIGITAL SYSTEMS, INSTITUTIONS, RIGHTS AND REMEDIES	CHAPTERS 14-17
PART V	COMPARATIVE DIGITAL-ASSET ORDERS	CHAPTERS 18-22
PART VI	GLOBAL STANDARDS AND INTERNATIONAL LAW	CHAPTERS 23-25
PART VII	BUILDING PAKISTAN'S FUTURE DIGITAL-ASSET ORDER	CHAPTER 26

PARAGRAPH AND SUBPARAGRAPH NUMBERS ARE THE PRINCIPAL NAVIGATION COORDINATES.

CHAPTER 01

The Governing Thesis: Code, Law and Capital

1.1 The Governing Question, Thesis and Research Questions

- 1.1.1 Why category-by-category inquiries miss the legal order
- 1.1.2 The central thesis: authority, control, value, risk and remedy
- 1.1.3 The questions the Treatise answers

1.2 Pakistan as a National Case and a Global Inquiry

- 1.2.1 Pakistan's constitutional, monetary and institutional setting
- 1.2.2 The global relevance of the Pakistani case

1.3 Code: Architecture, Execution and Control

- 1.3.1 Protocol rules, software and operational facts
- 1.3.2 Control points, dependencies and failure modes

1.4 Law: Authority, Institutions and Reasons

- 1.4.1 Validity, competence, rights, duties and remedies
- 1.4.2 Why execution cannot substitute for legal authority

1.5 Capital: Value, Power and the Distribution of Risk

- 1.5.1 Market incentives and monetary consequences
- 1.5.2 Who gains, who controls and who bears loss

1.6 The Intelligent-Order Test

- 1.6.1 Legality, capability, evidence and accountability
- 1.6.2 Coherence across code, law and capital

1.7 Strategic, Anticipatory and Evolutionary Legal Intelligence

- 1.7.1 Present position and lawful options
- 1.7.2 Future stress, institutional adaptation and legal learning

1.8 Method, Sources, Status and Vocabulary in Use

- 1.8.1 Integrated legal exposition and construction
- 1.8.2 Primary authority, source-status discipline and qualified claims
- 1.8.3 Vocabulary integrated where each concept first operates

1.9 The Treatise's Original Contribution and Global Route

- 1.9.1 A unified constitutional and regulatory inquiry
- 1.9.2 Handoff to the global evolution of digital-asset systems

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 02

From Electronic Value to the Global Digital-Asset Order

2.1 Electronic Value Before Blockchain

- 2.1.1** Institution-centred ledgers, payment networks and stored value
- 2.1.2** Trusted intermediaries and the pre-blockchain allocation of control

2.2 Distributed Ledgers and the Problem of Shared State

- 2.2.1** From institutional books to replicated state
- 2.2.2** Consensus, finality and legal consequence

2.3 Bitcoin: Cryptographic Scarcity and Peer-to-Peer Transfer

- 2.3.1** The double-spend problem and proof-of-work
- 2.3.2** Keys, transaction finality and the separation of network from legal order

2.4 Programmable Ledgers and Smart-Contract Platforms

- 2.4.1** Ethereum and general-purpose execution
- 2.4.2** Tokens, composability and application-layer governance

2.5 Tokenisation and Stable-Value Arrangements

- 2.5.1** Native tokens, claims on assets and tokenised rights
- 2.5.2** Stablecoins, reserves, redemption and monetary linkage

2.6 Decentralised Finance

- 2.6.1** Exchanges, lending, derivatives, liquidity and bridges
- 2.6.2** Decentralisation as a spectrum of actual control

2.7 DAOs and Protocol Governance

- 2.7.1** Organisation without conventional incorporation
- 2.7.2** Governance, accountability and the limits of automation

2.8 Adoption, Market Cycles and Institutional Entry

- 2.8.1** Retail use, remittances, speculation and payment propositions
- 2.8.2** Custodians, exchanges, funds, banks and tokenised markets

2.9 Recognition by Courts, Legislatures and Regulators

- 2.9.1** Property, payment, securities and insolvency questions
- 2.9.2** From warnings and enforcement to licensing and statutory recognition

2.10 Policy, Governance, Law and Regulation

- 2.10.1** Consumer protection, financial integrity and systemic risk
- 2.10.2** Innovation, sovereignty, inclusion and public capacity

2.11 The Emerging World Digital-Asset Order

- 2.11.1** The United States: plural perimeters and contested classification
- 2.11.2** European and Asian models

2.12 Handoff to Pakistan

- 2.12.1** What the global history establishes
- 2.12.2** The Pakistan inquiry

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 03

Pakistan's Digital-Asset Order: From Perimeter Preservation to Statutory Recognition

3.1 The Inherited Legal and Institutional Setting

- 3.1.1 Money, banking, foreign exchange, securities and criminal law
- 3.1.2 Digital and electronic legislation before virtual-asset legislation

3.2 International Influences and Domestic Institutional Caution

- 3.2.1 FATF pressure, financial-integrity concerns and policy transfer
- 3.2.2 The limits of treating external standards as domestic law

3.3 Warnings, Banking Restrictions and Foreign-Exchange Control

- 3.3.1 SBP communications and regulated-entity conduct
- 3.3.2 FERA, outward value transfer and the preservation of the financial perimeter

3.4 Market Use, Public Claims and Legal Ambiguity

- 3.4.1 P2P activity, exchanges, mining and public participation
- 3.4.2 The difference between economic existence and legal recognition

3.5 Litigation and the Exposure of Institutional Gaps

- 3.5.1 Waqar Zaka and related public-law claims
- 3.5.2 Judicial limits where policy, statute and evidence remain incomplete

3.6 Institutional Experimentation

- 3.6.1 Committees, policy bodies, consultations and interim arrangements
- 3.6.2 Authority, publication and evidential limits

3.7 The Ordinance Interlude

- 3.7.1 Temporary executive law and its legal consequences
- 3.7.2 Continuity, expiry and the limits of transitional instruments

3.8 The Virtual Assets Act 2026

- 3.8.1 Passage from temporary framework to primary legislation
- 3.8.2 Recognition, authority and delegated completion

3.9 Continuity, Savings and Transitional Legal Effect

- 3.9.1 What sections 70 and 74 preserve
- 3.9.2 What remains unpreserved, unauthorised or status-dependent

3.10 Statutory Recognition and Operational Completion

- 3.10.1 Recognition without a complete licensing and supervisory order
- 3.10.2 The distinction between enacted framework and executable legal system

3.11 Consequences of Legal Sequence

- 3.11.1 Continuity rather than a legal reset
- 3.11.2 Present consequences for institutions and market actors

Conclusion and Standalone Contribution

Selected Authorities and Independent-Use Note

CHAPTER 04

Code: Digital-Asset Technologies, Functions and Control

4.1 A Functional Method

- 4.1.1 From product names to operative facts
- 4.1.2 Asset, activity, actor, infrastructure and control

4.2 Ledgers and the Architecture of State

- 4.2.1 Consensus, validation, ordering and finality
- 4.2.2 Forks, governance and state changes

4.3 Keys, Wallets and Control

- 4.3.1 Private keys, custody and signing authority
- 4.3.2 Why control is not necessarily ownership

4.4 Digital-Asset Taxonomy

- 4.4.1 Native assets, utility, governance and asset-referenced tokens
- 4.4.2 Stablecoins, tokenised claims, NFTs and real-world assets

4.5 Service-Provider Taxonomy

- 4.5.1 Exchange, transfer, custody, dealing and intermediation
- 4.5.2 Issuance, brokerage, settlement and infrastructure functions

4.6 Smart Contracts, Oracles and Bridges

- 4.6.1 Execution and external data dependencies
- 4.6.2 Bridge risk, upgrade authority and decentralisation claims

4.7 Mining, Validation, Energy and Infrastructure

- 4.7.1 Consensus participation and reward
- 4.7.2 Electricity, equipment, hosting and environmental consequences

4.8 Transaction and Custody Lifecycles

- 4.8.1 Initiation, authorisation, broadcast, settlement and record
- 4.8.2 Where failure, evidence and legal responsibility arise

4.9 The Code-to-Law Handoff

- 4.9.1 Facts requiring legal characterisation
- 4.9.2 Control points requiring institutional responsibility

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 05

Law: Authority, Interpretation and the Digital Legal Order

5.1 What Counts as Law

- 5.1.1 Constitution, statute, delegated legislation and binding judgment
- 5.1.2 Policy, guidance, standards, websites and other non-equivalent materials

5.2 Constitutional Authority and Legislative Competence

- 5.2.1 Federal and provincial allocation
- 5.2.2 Fundamental rights, legality and public power

5.3 Legislative Form, Commencement, Savings and Transition

- 5.3.1 Enactment, commencement and delegated authority
- 5.3.2 Savings, accrued positions and prospective regulation

5.4 Classification, Characterisation and Functional Regulation

- 5.4.1 Classifying the asset and the activity
- 5.4.2 Overlap and cumulative application

5.5 Jurisdiction, Territory and Connecting Factors

- 5.5.1 Territorial reach in networked markets
- 5.5.2 Comparative law and domestic authority

5.6 Rights, Reasons and Administrative Fairness

- 5.6.1 Public power and affected rights
- 5.6.2 Notice, hearing and reasons

5.7 Evidence, Proof and Legal Truth

- 5.7.1 Technical records as evidence
- 5.7.2 Authenticity, integrity and chain of custody

5.8 Pakistan's Digital, Electronic and ICT Statutory Family

- 5.8.1 Integration across general and sectoral laws
- 5.8.2 Fragmentation, overlap and institutional handoffs

5.9 Integration Principles

- 5.9.1 A legal sequence for digital-asset questions
- 5.9.2 The rule-of-law contribution

Conclusion and Standalone Contribution

Selected Authorities and Independent-Use Note

CHAPTER 06

Capital: Markets, Monetary Sovereignty and Distribution

6.1 Capital as a Constitutional and Institutional Question

- 6.1.1 Value formation and public order
- 6.1.2 Capability, power and the allocation of loss

6.2 Pakistan's Macro-Financial Setting

- 6.2.1 Foreign-exchange constraints, inflation and financial inclusion
- 6.2.2 Banking structure, capital markets and public capacity

6.3 Participation and Market Structure

- 6.3.1 What adoption evidence establishes
- 6.3.2 Retail, institutional and offshore participation

6.4 Payments, Remittances and Settlement

- 6.4.1 Efficiency propositions and evidential limits
- 6.4.2 Domestic settlement, cross-border value and monetary control

6.5 Stablecoins and Monetary Sovereignty

- 6.5.1 Dollarisation, reserve assets and redemption
- 6.5.2 Capital flight, payment substitution and policy response

6.6 Investment, Venture and Enterprise Formation

- 6.6.1 Funding, entrepreneurship and institutional capital
- 6.6.2 Legal certainty, market access and risk

6.7 Tokenisation and Productive Capital

- 6.7.1 Claims on real assets and infrastructure
- 6.7.2 Liquidity promises, enforceability and governance

6.8 Leverage, Liquidity and Market Failure

- 6.8.1 Interconnection and run dynamics
- 6.8.2 Contagion, insolvency and loss allocation

6.9 Distribution, Inclusion and Consumer Welfare

- 6.9.1 Access, exclusion and unequal incidence
- 6.9.2 Who receives value and who absorbs failure

6.10 Public Revenue and Strategic Sequencing

- 6.10.1 Tax, compliance cost and institutional resources
- 6.10.2 Evidence-gated market construction

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 07

Pakistan's Digital, Electronic and ICT Legal Architecture

7.1 The Constitutional Setting of Digital Public Power

- 7.1.1 Legality, rights, competence and delegation
- 7.1.2 Digital administration and institutional accountability

7.2 Electronic Transactions and Legal Recognition

- 7.2.1 Electronic Transactions Ordinance 2002
- 7.2.2 Electronic records, signatures, attribution and evidential consequences

7.3 Cybercrime, Systems and Communications

- 7.3.1 PECA and related powers
- 7.3.2 Offences, investigation, platform duties and constitutional limits

7.4 Digital Identity, Data and Public Infrastructure

- 7.4.1 Identity systems, authentication and data exchange
- 7.4.2 Privacy, security and the general-law gap

7.5 The Digital Nation Pakistan Act

- 7.5.1 Institutional design, planning and implementation
- 7.5.2 Current status, delegated architecture and unresolved execution

7.6 The Digital Presence Proceeds Tax Act 2025

- 7.6.1 A fiscal connecting rule, not a general digital licence
- 7.6.2 Interaction with virtual assets and cross-border services
- 7.6.3 Constitutional and treaty discipline

7.7 Payments, Telecommunications and ICT Regulation

- 7.7.1 Payment and settlement infrastructure
- 7.7.2 Communications, platforms and cumulative duties

7.8 Integration and Fragmentation

- 7.8.1 Overlapping definitions, authorities and remedies
- 7.8.2 Gaps between digital, electronic, financial and virtual-asset laws

7.9 A Coherent Digital Legal Order

- 7.9.1 Principles for statutory interaction
- 7.9.2 Handoff to the Virtual Assets Act and PVARA

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 08

The Virtual Assets Act 2026 and PVARA

8.1 Status, Object and Constitutional Setting

- 8.1.1** Primary legislation, commencement and legal force
- 8.1.2** Statutory object and relationship with existing law

8.2 Definitions, Scope and Territorial Reach

- 8.2.1** Virtual assets, VASPs and exclusions
- 8.2.2** Offshore conduct, effects and cross-border services

8.3 PVARA's Constitution and Governance

- 8.3.1** Composition, appointments and delegation
- 8.3.2** Independence, accountability and conflicts

8.4 Functions, Policy and Inter-Agency Interfaces

- 8.4.1** Regulation, supervision and public coordination
- 8.4.2** SBP, SECP, FMU, FBR and other authorities

8.5 Licensing and Supervisory Architecture

- 8.5.1** Entity status, permitted activities and continuing obligations
- 8.5.2** Inspection, information and risk-based supervision

8.6 Rules, Regulations, Standards and Directions

- 8.6.1** Federal Rules and PVARA Regulations
- 8.6.2** Hierarchy, publication, consultation and legal effect

8.7 Investigation, Enforcement and Sanctions

- 8.7.1** Powers, offences, penalties and procedural safeguards
- 8.7.2** Evidence, proportionality and judicial control

8.8 Fund, Staffing, Audit and Public Accountability

- 8.8.1** Resources and operational capability
- 8.8.2** Reporting, transparency and institutional proof

8.9 Tribunal, Appeals and Constitutional Review

- 8.9.1** Statutory review routes
- 8.9.2** Court jurisdiction and Article 175F questions

8.10 Transition, Savings and the NOC Bridge

- 8.10.1** Continuity of prior instruments and actions
- 8.10.2** The exact legal reach of transitional arrangements

8.11 Statutory Gaps and Delegated Boundaries

- 8.11.1** Issuer, customer-asset and inter-regulator gaps
- 8.11.2** What cannot lawfully be supplied by guidance alone

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 09

Market Entry, Existing Participants and Transitional Legality

9.1 Functional Perimeter and Actor Classification

- 9.1.1 Regulate activity rather than label
- 9.1.2 Holder, trader, issuer, intermediary and service provider

9.2 Existing Virtual-Asset Holders

- 9.2.1 Holding, disposal and own-account activity
- 9.2.2 Source, ownership, valuation and transaction evidence

9.3 Own-Account P2P Transactions

- 9.3.1 When a participant remains a principal
- 9.3.2 When repeated conduct becomes dealing, brokerage or another regulated service

9.4 Incumbent Local Service Providers

- 9.4.1 Legacy operations, customers and contractual obligations
- 9.4.2 Migration into a statutory licensing system

9.5 No General Amnesty, Exemption or Grace Period

- 9.5.1 What current law does not expressly provide
- 9.5.2 Why disclosure, banking history or market longevity does not create immunity

9.6 Statutory Transition and NOC Routes

- 9.6.1 Who may rely on a transition
- 9.6.2 Conditions, duration, scope and revocation

9.7 Grandfathering, Regularisation and Safe Harbour

- 9.7.1 The difference between existing law and proposed policy
- 9.7.2 Requirements for any valid future regularisation mechanism

9.8 New Entrants, Licensing and Activity Permission

- 9.8.1 Application, fitness, governance and capital
- 9.8.2 Entity status versus permission to conduct each function

9.9 Issuers, Offers and the Section 43 Gap

- 9.9.1 Token issuance and public offers
- 9.9.2 Securities, disclosure and market-conduct interfaces

9.10 Foreign VASPs and Cross-Border Offering

- 9.10.1 Territorial nexus and local presence
- 9.10.2 Recognition, reliance and enforcement

9.11 Exit, Failure and Customer Continuity

- 9.11.1 Suspension, surrender and winding down
- 9.11.2 Customer assets, records and remedies

Conclusion and Standalone Contribution

Selected Authorities and Independent-Use Note

CHAPTER 10

The Monetary and Financial Perimeter

10.1 One Product, Several Legal Perimeters

- 10.1.1** Money, payment, foreign exchange, banking, securities and futures
- 10.1.2** Joint characterisation and institutional allocation

10.2 State Bank of Pakistan Act

- 10.2.1** Central-bank functions and monetary authority
- 10.2.2** Limits of statutory inference for private digital assets

10.3 Foreign Exchange Regulation Act 1947

- 10.3.1** Foreign exchange, payments and value transfer
- 10.3.2** Resident, non-resident and offshore transaction legs

10.4 Banking Companies Ordinance

- 10.4.1** Deposit-taking, banking business and prudential exposure
- 10.4.2** Custody, settlement and unauthorised banking risks

10.5 Payment Systems and Electronic Fund Transfers Act

- 10.5.1** Payment systems, operators and electronic transfer
- 10.5.2** Stable-value and wallet interfaces

10.6 SBP Circular CL 10 of 2026

- 10.6.1** Banking services for licensed VASPs
- 10.6.2** Customer due diligence, account controls and the limits of the circular

10.7 Banks in P2P Transactions

- 10.7.1** Banks as fiat payment rails rather than certifiers of the virtual-asset sale
- 10.7.2** What a bank record proves and what it does not prove

10.8 Securities Act, Futures Market Act and SECP Act

- 10.8.1** Investment contracts, securities, derivatives and market infrastructure
- 10.8.2** Regulatory overlap and functional classification

10.9 Stablecoins and Fiat-Referenced Tokens

- 10.9.1** Reserve, redemption, payment and investment functions
- 10.9.2** Monetary sovereignty and cross-border exposure

10.10 Tokenised Real-World Assets

- 10.10.1** Re-entry into property, securities and secured-transactions law
- 10.10.2** Issuer, custodian and market-infrastructure obligations

10.11 Inter-Regulator Perimeter Resolution

- 10.11.1** SBP, SECP, PVARA and other authorities
- 10.11.2** Reasoned classification, coordination and review

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 11

Property, Custody, Customer Assets, Insolvency and Market Conduct

11.1 Control Is Not Title

- 11.1.1 Operational control and legal ownership
- 11.1.2 Keys, accounts, intermediated holdings and agency

11.2 Property Characterisation

- 11.2.1 Things in action, intangible property and statutory concepts
- 11.2.2 Transfer, tracing and enforceability

11.3 Custody Models and Legal Relationships

- 11.3.1 Hosted, omnibus, segregated and self-custody models
- 11.3.2 Trust, bailment, agency, contract and control

11.4 Segregation, Reconciliation and Recordkeeping

- 11.4.1 On-chain and off-chain books
- 11.4.2 Customer entitlements, shortfalls and proof

11.5 Insolvency and Priority

- 11.5.1 Estate inclusion and customer claims
- 11.5.2 Return, set-off, secured claims and shortfall allocation

11.6 Operational Custody Duties

- 11.6.1 Key management, cybersecurity and transaction controls
- 11.6.2 Delegation, sub-custody and outsourcing

11.7 Market Conduct and Conflicts

- 11.7.1 Execution, disclosure and fair dealing
- 11.7.2 Principal trading, listing, incentives and related parties

11.8 Manipulation, Insider Conduct and Surveillance

- 11.8.1 Market abuse in fragmented venues
- 11.8.2 Evidence, monitoring and enforcement

11.9 Consumer Protection and Redress

- 11.9.1 Risk disclosure, complaints and compensation
- 11.9.2 Misrepresentation, negligence and statutory remedies

11.10 Failure and Loss-Allocation Scenarios

- 11.10.1 Exchange, custodian, stablecoin and bridge failure
- 11.10.2 Who bears loss under current and proposed law

Conclusion and Standalone Contribution

Selected Authorities and Independent-Use Note

CHAPTER 12

Financial Integrity, Sanctions and Evidentiary Enforcement

12.1 Risk and Legal Architecture

- 12.1.1 AMLA 2010, counter-terrorism law and sanctions
- 12.1.2 Virtual-asset-specific allocation under the 2026 framework

12.2 Reporting-Entity and VASP Coverage

- 12.2.1 Persons, functions and thresholds
- 12.2.2 Issuer, DeFi and non-custodial gaps

12.3 Risk Assessment and Customer Due Diligence

- 12.3.1 Identification, verification and ongoing monitoring
- 12.3.2 Enhanced due diligence and source of funds or wealth

12.4 Beneficial Ownership and Actual Control

- 12.4.1 Corporate, protocol and wallet control
- 12.4.2 Nominees, DAOs and complex arrangements

12.5 Transaction Monitoring, STRs, CTRs and goAML

- 12.5.1 Indicators, escalation and reporting
- 12.5.2 Quality, proportionality and recordkeeping

12.6 Targeted Financial Sanctions

- 12.6.1 Freezing, prohibition and reporting
- 12.6.2 Proliferation financing and cross-border coordination

12.7 Travel Rule

- 12.7.1 Originator and beneficiary information
- 12.7.2 Thresholds, self-hosted wallets and interoperability

12.8 Investigations and Digital Evidence

- 12.8.1 Wallet attribution, tracing and exchange records
- 12.8.2 Seizure, preservation and chain of custody

12.9 Enforcement Handoffs

- 12.9.1 FMU, PVARA, FIA, police, prosecutors and courts
- 12.9.2 Jurisdiction, lawful access and evidentiary sufficiency

12.10 Effectiveness, Proportionality and Financial Inclusion

- 12.10.1 Risk-based control versus blanket exclusion
- 12.10.2 Legitimate users, remittances and de-risking

Conclusion and Standalone Contribution

Selected Authorities and Independent-Use Note

CHAPTER 13

Fiscal Order: Recognition, Taxation, Disclosure and Public Finance

13.1 Constitutional Fiscal Competence

- 13.1.1 Federal income and capital taxation
- 13.1.2 Provincial services and other fiscal perimeters

13.2 Fiscal Recognition Without a Complete Fiscal Architecture

- 13.2.1 Virtual assets within broad concepts of property and assets
- 13.2.2 Why functional recognition is not a comprehensive statutory taxonomy

13.3 Income, Capital Asset and Stock-in-Trade Classification

- 13.3.1 Income Tax Ordinance section 37 and property of any kind
- 13.3.2 Business income, capital gain, mining, staking and rewards

13.4 FBR Declaration and Wealth Disclosure

- 13.4.1 Returns, wealth statements and self-assessment
- 13.4.2 Disclosure as compliance evidence rather than a universal ruling, title confirmation or regulatory approval

13.5 Unexplained Sources and Section 111

- 13.5.1 Acquisition cost, source of funds and documentary continuity
- 13.5.2 Legacy holdings, offshore venues and evidential exposure

13.6 Valuation, Cost, Disposal and Section 75A

- 13.6.1 Fair value, basis, timing and exchange records
- 13.6.2 Bank or digital payment trails for asset acquisition and their limitations

13.7 P2P Banking Evidence

- 13.7.1 Fiat transfer records and counterparty identification
- 13.7.2 Why banking involvement does not prove the token leg, legality, ownership or finality

13.8 Residence, Source and Cross-Border Activity

- 13.8.1 Offshore platforms, non-residents and foreign income
- 13.8.2 FERA, remittance and reporting interactions

13.9 Treatment by Actor and Function

- 13.9.1 Holder, trader, miner, validator, issuer, employee and service provider
- 13.9.2 DeFi, airdrops, forks and tokenised claims

13.10 Withholding, Reporting and Tax Administration

- 13.10.1 FBR powers and third-party information
- 13.10.2 VASP obligations and Virtual Assets Act section 66

13.11 Accounting, Audit and Financial Statements

- 13.11.1 Recognition, measurement and impairment
- 13.11.2 Custody, reserves, liabilities and disclosures

13.12 CARF, DAC8 and International Tax Transparency

- 13.12.1 Reporting architecture and exchange of information
- 13.12.2 Why tax transparency is not market licensing

13.13 Public Revenue and Compliance Cost

- 13.13.1 Fiscal yield, administrative capability and proportionality
- 13.13.2 A lawful future tax taxonomy and any expressly enacted regularisation mechanism

Conclusion and Standalone Contribution

Selected Authorities and Independent-Use Note

CHAPTER 14

Data, Cybersecurity, Digital Identity and Evidence

14.1 The Data Lifecycle and Legal Map

- 14.1.1 Collection, use, sharing, retention and deletion
- 14.1.2 Public, customer and transactional data

14.2 Personal Data and the General-Law Gap

- 14.2.1 Sectoral duties and constitutional privacy
- 14.2.2 Consent, lawful basis and sensitive financial data

14.3 Digital Identity and Lawful Sharing

- 14.3.1 KYC, authentication and reusable identity
- 14.3.2 Public databases, private providers and access controls

14.4 Cyber Governance and Operational Resilience

- 14.4.1 Risk management, testing and incident response
- 14.4.2 Critical systems, outsourcing and recovery

14.5 Regulatory Reporting and Supervisory Data

- 14.5.1 Data quality, standards and interfaces
- 14.5.2 Privacy, minimisation and institutional access

14.6 Cross-Border Data and the Travel Rule

- 14.6.1 Transfer restrictions and interoperability
- 14.6.2 Sanctions, secrecy and foreign requests

14.7 Electronic Transactions and Signatures

- 14.7.1 Formation, attribution and integrity
- 14.7.2 Automated communications and evidential weight

14.8 Electronic and On-Chain Evidence

- 14.8.1 Authenticity, relevance and expert interpretation
- 14.8.2 Blockchain records, screenshots, logs and exchange data

14.9 Preservation, Seizure and Courtroom Chain

- 14.9.1 Forensic acquisition and continuity
- 14.9.2 Admissibility, disclosure and challenge

14.10 Automated Analysis and Evidential Limits

- 14.10.1 Clustering, attribution and probabilistic inference
- 14.10.2 Human verification, explainability and contestability

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 15

Smart Contracts, DeFi, DAOs and Autonomous Systems

15.1 From Code Execution to Legal Consequence

- 15.1.1 Performance, settlement and state change
- 15.1.2 Why execution is not self-validating law

15.2 Formation, Terms and Interpretation

- 15.2.1 Offer, acceptance, intention and incorporated code
- 15.2.2 Natural language, code conflict and contextual interpretation

15.3 Error, Exploit, Oracle and Upgrade Risk

- 15.3.1 Mistake, vulnerability and governance intervention
- 15.3.2 Foreseeability, allocation and disclosure

15.4 Remedies and Reversibility

- 15.4.1 Injunction, restitution, damages and tracing
- 15.4.2 Technical irreversibility versus legal remedy

15.5 DeFi Functions, Dependencies and Actual Control

- 15.5.1 Trading, lending, leverage and liquidation
- 15.5.2 Front ends, administrators, validators and governance

15.6 DAO Constitution and Participant Responsibility

- 15.6.1 Membership, voting and treasury
- 15.6.2 Entity character, fiduciary questions and liability

15.7 Algorithmic Tokens and Market Conduct

- 15.7.1 Automated issuance, pricing and liquidation
- 15.7.2 Manipulation, disclosure and systemic feedback

15.8 Autonomous and AI-Mediated Agents

- 15.8.1 Authority, attribution and delegated decision-making
- 15.8.2 Liability, evidence and human responsibility

15.9 Conflict of Laws and Cross-Border Operation

- 15.9.1 Distributed systems and governing law
- 15.9.2 Forum, enforcement and asset location

15.10 Regulatory Design for Pakistan

- 15.10.1 Function-based duties and control tests
- 15.10.2 Sandboxing, auditability and bounded experimentation

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 16

Institutional Integrity, Federalism and Cross-Border Administration

16.1 Institutional Legality and Capability

- 16.1.1 Valid authority and operational ability
- 16.1.2 Resources, systems, reasons and accountability

16.2 PVARA's Constitution, Appointments and Delegation

- 16.2.1 Office, tenure and authority
- 16.2.2 Delegated decision-making and institutional proof

16.3 Policy Direction, Independence and Accountability

- 16.3.1 Executive policy and statutory discretion
- 16.3.2 Transparency, review and capture risk

16.4 Inter-Regulator Allocation

- 16.4.1 PVARA, SBP, SECP, FMU, FBR and FIA
- 16.4.2 Joint matters, lead authority and dispute resolution

16.5 Federal-Provincial Administration

- 16.5.1 Tax, services, police powers and public projects
- 16.5.2 Coordination without unconstitutional displacement

16.6 Transitional and Policy Bodies

- 16.6.1 Pakistan Crypto Council and other arrangements
- 16.6.2 Mandate, evidence, continuity and accountability

16.7 Resources, Operating Model and Administrative Proof

- 16.7.1 Budget, staffing, systems and service standards
- 16.7.2 Registers, decisions and auditable performance

16.8 Transparency, Publication and Version Control

- 16.8.1 Authoritative instruments and public notice
- 16.8.2 Legal certainty and status hygiene

16.9 Cross-Border Supervision and Cooperation

- 16.9.1 Information exchange and supervisory colleges
- 16.9.2 Foreign regulators, service providers and enforcement

16.10 Public Integrity

- 16.10.1 Conflicts, appointments and procurement
- 16.10.2 Reasoned administration and institutional trust

Conclusion and Standalone Contribution

Selected Authorities and Independent-Use Note

CHAPTER 17

Enforcement, Tribunal, Courts and Constitutional Remedies

17.1 The Enforcement Map

- 17.1.1 Administrative, civil and criminal pathways
- 17.1.2 Competence, sequencing and coordination

17.2 Inspection, Investigation and Information Powers

- 17.2.1 Entry, production, interviews and digital access
- 17.2.2 Necessity, privilege and procedural safeguards

17.3 Administrative Measures and Sanctions

- 17.3.1 Directions, suspension, cancellation and monetary penalties
- 17.3.2 Proportionality, reasons and publication

17.4 Offences, Prosecution and Asset Measures

- 17.4.1 Elements, mens rea and corporate responsibility
- 17.4.2 Seizure, freezing, confiscation and third-party rights

17.5 The Tribunal

- 17.5.1 Constitution, jurisdiction and procedure
- 17.5.2 Independence, expertise and institutional reality

17.6 Courts and Article 175F

- 17.6.1 Constitutional court architecture
- 17.6.2 Consistent treatment across statute, appeal and judicial review

17.7 Due Process and Fundamental Rights

- 17.7.1 Notice, hearing, reasons and equality
- 17.7.2 Privacy, property, expression and business rights

17.8 Evidence and Burden

- 17.8.1 Official records, expert proof and digital attribution
- 17.8.2 Presumptions, standards and contestability

17.9 Judicial Review and Constitutional Remedies

- 17.9.1 Jurisdictional error, legality and proportionality
- 17.9.2 Public-interest litigation and institutional restraint

17.10 Customer and Market Remedies

- 17.10.1 Complaints, compensation and restitution
- 17.10.2 Collective loss, insolvency and enforcement coordination

Conclusion and Standalone Contribution

Selected Authorities and Independent-Use Note

CHAPTER 18

The United States: Markets, Enforcement and the Contest for Regulatory Authority

18.1 Constitutional and Federal Structure

- 18.1.1 Enumerated federal power and state police powers
- 18.1.2 Courts, agencies and separation of powers

18.2 Federal and State Allocation

- 18.2.1 Federal financial law
- 18.2.2 State money-transmission, trust and digital-asset statutes

18.3 Securities Law and the Investment-Contract Inquiry

- 18.3.1 Howey and transaction-specific analysis
- 18.3.2 Tokens, schemes, disclosure and secondary markets

18.4 Commodities, Derivatives and CFTC Authority

- 18.4.1 Commodity character and derivatives jurisdiction
- 18.4.2 Spot-market limits and anti-fraud authority

18.5 Banking, Payments and Money Transmission

- 18.5.1 Federal banking agencies and payment law
- 18.5.2 State licensing and stable-value activity

18.6 Stablecoins and Dollar-Based Digital Finance

- 18.6.1 Reserve, redemption and issuer structure
- 18.6.2 Dollar influence, payment innovation and systemic questions

18.7 Taxation and Treatment as Property

- 18.7.1 Federal tax classification and reporting
- 18.7.2 Basis, disposal, mining, staking and intermediaries

18.8 Insolvency, Custody and Customer Assets

- 18.8.1 Bankruptcy estates and customer claims
- 18.8.2 Segregation, control and intermediary failure

18.9 Judicial Decisions and Enforcement-Led Development

- 18.9.1 SEC, CFTC, DOJ and state actions
- 18.9.2 What litigation clarified and what remains contested

18.10 DeFi, Tokenisation and Market Structure

- 18.10.1 Protocol functions and intermediaries
- 18.10.2 Digital securities, exchanges and clearing

18.11 Executive Policy and Legislative Change

- 18.11.1 Executive orders, agency coordination and policy reversal
- 18.11.2 Congressional proposals and enacted change

18.12 State Innovation and Regulatory Fragmentation

- 18.12.1 New York, Wyoming and other models
- 18.12.2 Competition, inconsistency and passporting limits

18.13 The United States' Global Market Influence

- 18.13.1 Dollar, capital markets, technology and enforcement reach
- 18.13.2 Extraterritorial effects on platforms and states

18.14 Lessons and Limits for Pakistan

- 18.14.1 Transferable institutional insights
- 18.14.2 Features that cannot be copied without constitutional and market fit

Conclusion and Standalone Contribution

Selected Authorities and Independent-Use Note

CHAPTER 19

The United Kingdom and European Legal Orders

19.1 The United Kingdom after Brexit

- 19.1.1 A distinct domestic legal order
- 19.1.2 Regulatory interaction with, but separation from, the European Union

19.2 UK Judicial Recognition

- 19.2.1 Cryptoassets as property
- 19.2.2 Proprietary injunctions, tracing, service and disclosure

19.3 UK Financial-Services Perimeter

- 19.3.1 Specified investments and regulated activities
- 19.3.2 Exchange, custody, financial promotions and registration

19.4 UK Payments, Stablecoins and Digital Securities

- 19.4.1 Payment services and stable-value activity
- 19.4.2 Digital securities, market infrastructure and tokenisation

19.5 UK Insolvency, Custody and Law Reform

- 19.5.1 Customer assets and intermediary failure
- 19.5.2 Law Commission and legislative development

19.6 The European Union as a Supranational Legal Order

- 19.6.1 Institutional competence and directly applicable legislation
- 19.6.2 Member-state implementation and residual national law

19.7 Markets in Crypto-Assets Regulation

- 19.7.1 Authorisation, issuers and service providers
- 19.7.2 Asset-referenced and electronic-money tokens

19.8 Transfer of Funds and AML Framework

- 19.8.1 Travel Rule and information duties
- 19.8.2 AML authority, supervision and sanctions

19.9 DLT Market Infrastructure and Tokenised Finance

- 19.9.1 Pilot regime and market infrastructure
- 19.9.2 Securities law, settlement and central-bank interaction

19.10 Prudential Treatment and Operational Resilience

- 19.10.1 Capital, custody and concentration
- 19.10.2 DORA, outsourcing and incident control

19.11 Data Protection and Digital Identity

- 19.11.1 GDPR and cross-border data
- 19.11.2 Identity, privacy and supervisory access

19.12 UK-EU Comparison and Lessons for Pakistan

- 19.12.1 Common-law development versus supranational legislation
- 19.12.2 Transferable rules and institutional limits

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 20

Asian and Asia-Pacific Digital-Asset Orders

20.1 Asia Is Not a Single Regulatory Model

- 20.1.1** Different constitutional, monetary and market structures
- 20.1.2** Licensing, restriction, experimentation and state digital currency

20.2 Japan

- 20.2.1** Mt Gox, judicial characterisation and insolvency
- 20.2.2** Exchange licensing, custody, customer assets and stablecoins

20.3 Singapore

- 20.3.1** Payment-services regulation and licensing
- 20.3.2** Automated transactions, wholesale tokenisation and institutional markets

20.4 Hong Kong

- 20.4.1** Virtual-asset trading platforms and securities law
- 20.4.2** Institutional access, tokenisation and stablecoin development

20.5 People's Republic of China

- 20.5.1** Restrictions on private cryptoasset activity
- 20.5.2** Blockchain policy, state digital currency and monetary control

20.6 South Korea

- 20.6.1** Investor protection, exchanges and market conduct
- 20.6.2** Tax, custody and institutional development

20.7 India

- 20.7.1** Banking restrictions and constitutional litigation
- 20.7.2** Taxation, enforcement, regulatory uncertainty and recognition questions

20.8 Australia

- 20.8.1** Financial-services and market-law perimeter
- 20.8.2** Licensing reform, custody and consumer protection

20.9 New Zealand

- 20.9.1** *Ruscoe v Cryptopia* and property in insolvency
- 20.9.2** Regulatory treatment and service-provider obligations

20.10 Comparative Lessons for Pakistan

- 20.10.1** Recognition, licensing, custody and transition
- 20.10.2** What diverse Asian models reveal about institutional fit

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 21

GCC and Middle Eastern Digital-Asset Orders

21.1 The GCC as a Regional Setting

- 21.1.1** Institutional cooperation without a uniform digital-asset code
- 21.1.2** Member-state sovereignty and market competition

21.2 United Arab Emirates: Federal Order

- 21.2.1** Federal virtual-asset and financial regulation
- 21.2.2** Central Bank and Securities and Commodities Authority

21.3 Dubai and VARA

- 21.3.1** Territorial and activity-based regulation
- 21.3.2** Modular rulebooks, licensing and enforcement

21.4 ADGM and DIFC

- 21.4.1** Financial free-zone legal orders
- 21.4.2** Courts, regulators, common-law frameworks and jurisdictional overlap

21.5 Bahrain

- 21.5.1** Central-bank licensing and regulated cryptoasset services
- 21.5.2** Prudential, conduct and financial-integrity controls

21.6 Saudi Arabia

- 21.6.1** Monetary and securities policy
- 21.6.2** Fintech development, tokenisation and regulatory caution

21.7 Qatar, Oman and Kuwait

- 21.7.1** Distinct national approaches
- 21.7.2** Restriction, experimentation and institutional development

21.8 Islamic Finance and Digital Assets

- 21.8.1** Shariah characterisation and governance
- 21.8.2** Asset backing, uncertainty, speculation and product design

21.9 Cross-Border Capital and Regional Competition

- 21.9.1** Free zones, investment and market access
- 21.9.2** Regulatory arbitrage and supervisory cooperation

21.10 Lessons and Limits for Pakistan

- 21.10.1** Modularity, speed and institutional capability
- 21.10.2** Constitutional, market and public-law differences

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 22

ASEAN and Emerging Regional Models

22.1 ASEAN's Institutional Character

- 22.1.1** Cooperation rather than a MiCA-style uniform legal system
- 22.1.2** Member-state competence and regulatory divergence

22.2 Regional Financial Integration

- 22.2.1** Payments, settlement and capital-market coordination
- 22.2.2** Cross-border data and supervisory cooperation

22.3 Singapore's Regional Role

- 22.3.1** Institutional hub and wholesale experimentation
- 22.3.2** Cross-reference to the full Singapore treatment in Chapter 20

22.4 Malaysia

- 22.4.1** Securities regulation, recognised markets and digital assets
- 22.4.2** Islamic finance, custody and token offerings

22.5 Indonesia

- 22.5.1** Commodity, financial-sector and payment approaches
- 22.5.2** Transition of institutional responsibility

22.6 Thailand

- 22.6.1** Digital-asset business regulation
- 22.6.2** Exchange, token, payment and supervisory policy

22.7 Philippines

- 22.7.1** Virtual-asset service providers and payment regulation
- 22.7.2** Remittances, financial inclusion and enforcement

22.8 Vietnam

- 22.8.1** Market use and evolving legal policy
- 22.8.2** Payment restrictions and regulatory development

22.9 Divergence Among Member-State Models

- 22.9.1** Classification, licensing and enforcement
- 22.9.2** Why regional comparison must preserve national law

22.10 Cross-Border Payments and Regional Settlement

- 22.10.1** Interoperability and currency arrangements
- 22.10.2** Private digital assets and central-bank initiatives

22.11 Other Significant Comparative Models

- 22.11.1** Switzerland, Liechtenstein and Canada
- 22.11.2** Africa, Latin America and relevant offshore financial centres

22.12 Lessons for Pakistan

- 22.12.1** Regional cooperation without false harmonisation
- 22.12.2** Market, institutional and legal-design choices

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 23

Global Standards and Transnational Regulatory Coordination

23.1 Hard Law, Soft Law and Regulatory Standards

- 23.1.1** Different sources and different legal effects
- 23.1.2** Domestic incorporation, evidence and institutional influence

23.2 Financial Action Task Force

- 23.2.1** Virtual assets, VASPs and risk-based supervision
- 23.2.2** Travel Rule, beneficial ownership and proliferation financing

23.3 Financial Stability Board

- 23.3.1** Global regulatory framework and systemic risk
- 23.3.2** Cross-border consistency and implementation review

23.4 BIS and the Basel Committee

- 23.4.1** Bank exposure and prudential treatment
- 23.4.2** Tokenised deposits, stablecoins and market infrastructure

23.5 Committee on Payments and Market Infrastructures

- 23.5.1** Payment and settlement principles
- 23.5.2** Stablecoin and cross-border payment arrangements

23.6 International Organization of Securities Commissions

- 23.6.1** Market integrity and investor protection
- 23.6.2** DeFi, conflicts and multi-function platforms

23.7 International Monetary Fund and World Bank

- 23.7.1** Monetary, fiscal and institutional assessment
- 23.7.2** Technical assistance, conditionality and development

23.8 OECD and Crypto-Asset Reporting Framework

- 23.8.1** Tax transparency and reporting
- 23.8.2** Implementation, data exchange and legal limits

23.9 UNIDROIT Principles on Digital Assets and Private Law

- 23.9.1** Control, custody and transfer
- 23.9.2** Use as persuasive principles rather than domestic enactment

23.10 Accounting and Prudential Standards

- 23.10.1** Recognition, measurement and disclosure
- 23.10.2** Institutional exposure and comparability

23.11 Supervisory Colleges and Information Exchange

- 23.11.1** Cross-border coordination
- 23.11.2** Confidentiality, due process and accountability

23.12 Convergence, Fragmentation and Legal Effect in Pakistan

- 23.12.1** Standards as evidence, influence and conditionality
- 23.12.2** Why no standard is a treaty or directly enforceable law without valid incorporation

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 24

Public International Law and Digital Assets

24.1 Digital Assets as an International-Law Subject

- 24.1.1 State interests, private systems and transnational effects
- 24.1.2 The limits of category-based international claims

24.2 Sovereignty and Territorial Jurisdiction

- 24.2.1 Territorial links and digital infrastructure
- 24.2.2 Monetary sovereignty and regulatory space

24.3 Prescriptive, Adjudicative and Enforcement Jurisdiction

- 24.3.1 Bases of jurisdiction
- 24.3.2 Comity, reasonableness and enforcement limits

24.4 Nationality and Active-Personality Jurisdiction

- 24.4.1 Persons, corporations and beneficial ownership
- 24.4.2 Offshore conduct and state connection

24.5 State Responsibility and Attribution

- 24.5.1 Internationally wrongful acts
- 24.5.2 Attribution of digital conduct and private actors

24.6 Treaty Obligations and International Organisations

- 24.6.1 Financial, trade, investment, crime and cyber instruments
- 24.6.2 Institutional competence and domestic implementation

24.7 Sanctions and Countermeasures

- 24.7.1 Unilateral and multilateral measures
- 24.7.2 Digital assets, blocking, evasion and due process

24.8 Cyber Operations and Digital Financial Infrastructure

- 24.8.1 Critical infrastructure and cross-border harm
- 24.8.2 State duties, cooperation and response

24.9 Investigation, Mutual Legal Assistance and Extradition

- 24.9.1 Evidence and person-based cooperation
- 24.9.2 Speed, dual criminality and digital records

24.10 Confiscation and Asset Recovery

- 24.10.1 Freezing, tracing and return
- 24.10.2 Third-party rights and cross-border enforcement

24.11 Investment Treaties and Investor Protection

- 24.11.1 Digital-asset investments and state measures
- 24.11.2 Jurisdiction, legitimate expectations and regulatory power

24.12 CBDCs, Monetary Sovereignty and Human Rights

- 24.12.1 State digital currency and cross-border systems
- 24.12.2 Privacy, property, equality and access

24.13 Limits of Unilateral Extraterritorial Regulation

- 24.13.1 Overreach, conflict and fragmentation
- 24.13.2 Cooperation and principled jurisdiction

Conclusion and Standalone Contribution**Selected Authorities and Independent-Use Note**

CHAPTER 25

Private International Law and Cross-Border Digital Assets

25.1 The Cross-Border Character of Digital Assets

- 25.1.1 Distributed systems, intermediaries and users
- 25.1.2 Why location cannot be assumed from technology alone

25.2 Jurisdiction and Forum

- 25.2.1 Defendant, conduct, harm and contractual links
- 25.2.2 Exclusive clauses, consumers and parallel proceedings

25.3 Choice of Law

- 25.3.1 Express choice and objective connection
- 25.3.2 Mandatory rules and public policy

25.4 Situs of a Digital Asset

- 25.4.1 Competing connecting factors
- 25.4.2 Control, owner, intermediary, system and governing law

25.5 Proprietary and Contractual Characterisation

- 25.5.1 Rights against the world and personal obligations
- 25.5.2 Transfer, priority and remedies

25.6 Tokens, Networks and Governing Law

- 25.6.1 Issuer terms, protocol rules and system governance
- 25.6.2 Changes, forks and absent central counterparties

25.7 Custody and Intermediated Holdings

- 25.7.1 Account-based and wallet-based relationships
- 25.7.2 Sub-custody, segregation and third-party effects

25.8 Consumers, Investors and Decentralised Transactions

- 25.8.1 Protective jurisdiction and applicable law
- 25.8.2 Front ends, protocols and actual control

25.9 Recognition and Enforcement of Judgments

- 25.9.1 Foreign judgments and public policy
- 25.9.2 Orders against exchanges, wallets and unknown defendants

25.10 Cross-Border Insolvency

- 25.10.1 Centre of main interests and recognition
- 25.10.2 Customer assets, tracing and cooperation

25.11 Freezing, Disclosure and Service-Provider Failure

- 25.11.1 Interim relief and information orders
- 25.11.2 Exchange, custodian and protocol failure

25.12 Arbitration, Smart Contracts and DAOs

- 25.12.1 Agreement, seat and applicable law
- 25.12.2 Awards, code-based disputes and enforcement

25.13 Conflict-of-Laws Solutions for Pakistan

- 25.13.1 Statutory connecting rules and judicial method
- 25.13.2 Regional and international cooperation

Conclusion and Standalone Contribution

Selected Authorities and Independent-Use Note

CHAPTER 26 Building Pakistan's Digital-Asset Order

26.1 Construction, Not Assumed Reform

- 26.1.1 Why Pakistan is completing an incomplete order rather than repairing a mature one
- 26.1.2 The minimum elements of an operational legal system

26.2 The Present Position of Citizens, Holders and Incumbent Providers

- 26.2.1 Current exposure, uncertainty and evidential burdens
- 26.2.2 Immediate need for authoritative public transition guidance

26.3 Legal Validity and the Authoritative Instruments Register

- 26.3.1 Commencement, appointments, delegations and review routes
- 26.3.2 One authenticated and versioned public legal record

26.4 A Lawful Transition and Continuity Framework

- 26.4.1 Existing holders, own-account P2P users and incumbent providers
- 26.4.2 No implied amnesty; any grace, safe harbour or regularisation must be express, bounded and legally valid

26.5 Primary Legislative Completion

- 26.5.1 Perimeter, issuers, customer assets and insolvency
- 26.5.2 Enforcement, appeals, tax and regulator interfaces

26.6 Federal Rules, PVARA Regulations and Guidance

- 26.6.1 Proper allocation among instruments
- 26.6.2 Consultation, publication, commencement and version control

26.7 Licensing and Market Entry

- 26.7.1 Entity status, activity permission and continuing fitness
- 26.7.2 Foreign providers, local presence, exit and failure

26.8 Monetary, Banking and Market Perimeters

- 26.8.1 Joint SBP-SECP-PVARA determination
- 26.8.2 Stablecoins, tokenised assets and lawful banking access

26.9 Property, Custody and Customer Protection

- 26.9.1 Statutory recognition, segregation and reconciliation
- 26.9.2 Insolvency portability, complaints and compensation

26.10 Financial Integrity and Enforcement Capability

- 26.10.1 AMLA allocation, Travel Rule and sanctions
- 26.10.2 Investigation, digital evidence and proportionate inclusion

26.11 Fiscal Architecture and Existing Holdings

- 26.11.1 Express classification, valuation and reporting
- 26.11.2 Treatment of prior holdings, P2P evidence and any enacted regularisation route

26.12 Data, Cybersecurity and Digital Identity

- 26.12.1 General data law and sectoral duties
- 26.12.2 Operational resilience, identity and supervisory data

26.13 Institutions, Tribunal, Courts and Federalism

- 26.13.1 Responsibility protocol and resources
- 26.13.2 Due process, Article 175F and federal-provincial coordination

26.14 International and Comparative Positioning

- 26.14.1 Adopt, adapt or reject
- 26.14.2 Global standards, treaty obligations and conflict-of-laws readiness

26.15 Human-Governed Machine-Readable Regulation

- 26.15.1 Rules as code without fictional institutions or automated authority
- 26.15.2 Traceability, explanation, contestability and controlled change

26.16 Implementation Horizons

- 26.16.1 Now: legality, continuity and public notice
- 26.16.2 Next: operational completion
- 26.16.3 Then: evaluated scale, interoperability and consolidation

26.17 Future Scenarios and Anticipatory Legal Intelligence

- 26.17.1 Market, technology, geopolitical and institutional scenarios
- 26.17.2 Triggers, safeguards and revision pathways

26.18 Public Outcomes, Evidence and Accountability

- 26.18.1 Access, integrity, stability, innovation and rights
- 26.18.2 Metrics, independent review and legal learning

26.19 The Final Proposition

- 26.19.1 A digital-asset order worthy of code, law and capital
- 26.19.2 Authority remains human, public and legally accountable

Conclusion and Standalone Contribution

Selected Authorities and Independent-Use Note
